

BDV
CONDENSATE COLLECTION TANK**Main features**

Tank sized for steam boiler blow down expansion and cooling.
Vertical rounded tank complete with supporting legs and use connections, in conformity with PED 97/23 Directive, design pressure 8 bar, externally painted carbon steel.

Standard equipment

- purge suction inlet stop valve
- purge no return valve
- drain valve
- cooling system via solenoid valve and thermostat

**Legend:**

- N1 Spurge input
- N2 Drain
- N3 Atmospheric vent
- N4 Overflow fitting
- N5 Cooling system
- N6 Thermostat
- N7 Boiler surge level indicator connections
- N8 Boiler salinity purge connection
- N9 Manometer
