

## INDUSTRIAL RANGE

### COMPONENTS

# DEG/P

## TERMOPHYSICAL AIR SEPARATOR

### Main features

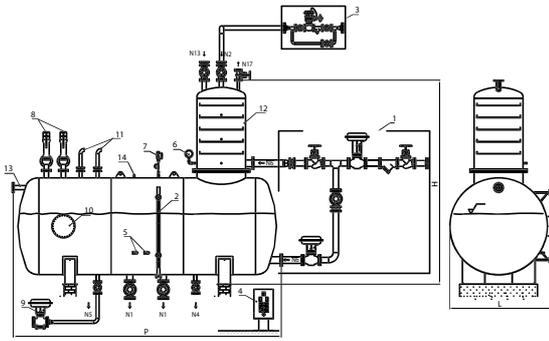

Apparatus for supply water thermophysical degassing of steam generator.

Some of the product's main features are related below:

- C stainless steel (stainless steel AISI 304 version also available), horizontal cylindrical accumulation tank with dished ends, with internal steam injection diffuser for temperature maintenance;
- vertical degassing turret, manufactured from C steel (stainless steel AISI 304 version also available) flanged to the lower reservoir with stainless steel AISI 304 jagged internal plates
- Insulating coating with high density mineral wool and aluminum sheet finish.
- Steel sheet support saddles and sectioned support base designed to ensure unit support.

### Accessories:

- steam regulating unit for temperature maintenance (105 °C) in the storage tank composed of:
  - self-driven pneumatic steam regulating valve
  - interception and bypass valve
  - steam filter
  - appropriate steam injectors
  - temperature probe
- steam regulating unit for pressure maintenance (0,2-0,4 bar) in the degassing turret composed of:
  - self-driven pneumatic steam regulating valve
  - interception and bypass valve
  - steam filter
  - appropriate steam injectors
  - pressure transmitter
- water adjustment unit for reservoir tank level control, composed of:
  - supply water electric valve
  - interception and bypass valve
  - water filter
  - probe level regulator
  - level indicator
  - thermometer
  - drain valve
  - safety valve
  - vacuum breaker valve
  - IP55 general electric panel

| Characteristics     | Code     | Design pressure | Design temperature | Total volume H <sub>2</sub> O | Deaeration capacity | Steam consumption | Weight total |
