

SIXEN (version recommended for export)

HIGH PRESSURE AND REVERSE FLAME STEAM BOILERS

Design pressure 12 or 15 bar

Main features

SIXEN smoke tubes steam boiler is package with automatic operation, complete with all accessories needed for rapid commissioning. Manufactured with quality steel according to regulations in force and is welded with automatic submerged arc methods.

Some of the product's main features are related below:

- P265GH UNI EN 10028/2 and P275NH UNI EN 10028/3 quality steel boiler body welded and tested with methods approved and labeled CE in accordance with the PED 97 /23/EC directive
- horizontal wetback combustion chamber with flame reversal, supported and guided by a perforated stub to ensure wet back design; has a corrugated surface beginning with SIXEN 5000 models
- flat tube plates with plasma drilled holes; front plate flanged towards the combustion chamber, with butt welding rather than angle throughout an angle, for models beginning with SIXEN 4000
- plate containment with flanged PN 16 or PN 40 EN 1092-1 connections for equipment operation; equipped with manhole and headhole, lifting eye bolt.
- P235GH UNI EN 10216/2 smoke tubes welded to tube plates, equipped with helical turbulators single steel sheet front door, thermally insulated refractive materials with high aluminum content, mounted on adjustable hinges, easily opened by handwheel bolts without the need to remove the burner; equipped with light indicator for combustion control
- steel sheet posterior smoke box can be removed using equipped bolts in order to clean the smoke pipes; provided with cleaning door and chimney connection
- support built from carbon steel sections able to support the entire unit.
- embossed metal sheet upper walkway for accessories service, parts located above the boiler
- high density, mineral wool mattress, adequate thickness thermal insulation, with corrugated stainless steel protective sheet mounted on a rectangular frame
- water pipe inspection openings side containing a flanged hatch (no. 2 inspections beginning with SIXEN 2500 model)
- suitability for liquid or gaseous fuels, for a steam production from 3500 to 5000 kg/h
- Supplied accessories needed for automatic operation with mechanical and hydraulic assembly for all equipment and certifications, also in compliance with the PED 97 /23/ EC Directive
- Electrical wiring converging to a single Boiler House control panel, having silicone insulated wires inserted in PVC protective pockets all subjected to final functionality test

Standard equipment:

- steam accessory group contains:
 - steam stop valve
 - 2 spring safety valves
 - 2 level indicators with direct reflection
 - 2 shut-off valve groups and drain indicator
- monitoring instrumentation curve, containing:
 - large dial 3 way test valve manometer
 - limit pressure gage
 - manual reset safety pressure gage
 - regulating pressure gage
- feed water pump mounted on boiler support containing:
 - **2 vertical multistage centrifugal pumps suitable for 120°C water**
 - **3 shut-off valves, powered at flow start**
 - **2 pump suction filters**
 - **3 non return valves**
- purging unit containing:
 - purge shut-off valve at flow start
 - male connection quick exhaust valve with manual lever
- automatic conductivity probe level regulator containing:
 - pump start up probe
 - pump shut-off probe
 - 1° alarm and burner block probe for low level
 - 2° alarm and burner block probe for low level
- boiler electric command panel, IP 55 400V/3 +N/ 50Hz electrical protection, composed of:
 - main switch
 - pump/main switch (off-manual-automatic)
 - burner switch
 - level regulation relay
 - low level 1° alarm relay with manual reset
 - low level 2° alarm relay with manual reset
 - high pressure light and alarm reset button
 - low level 1° pressure light and alarm reset button
 - low level 2° pressure light and alarm reset button
 - alarm siren

Central components:

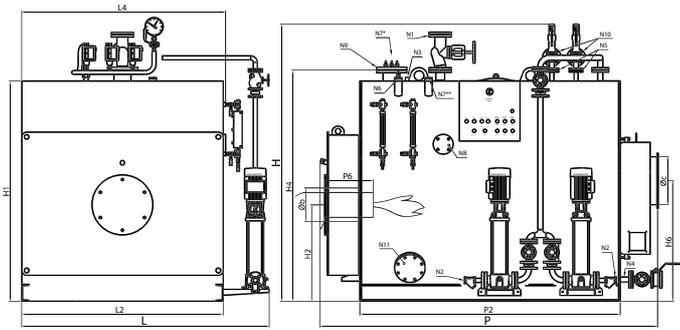

- ECXV vertical economizer
- VRC condensate collection vessel
- DEG atmospheric deaerator
- DEG/P pressurized atmospheric deaerator
- ADD power delivery water treatment unit
- BDV purge collection tank

For each product always indicate the code at the time of the order.
For higher or lower pressures see our commercial department.
SIXEN model with superheater available upon request

Available accessories	Code

INDUSTRIAL RANGE STEAM

SIXEN (version recommended for export)

Legend:

- N1 Steam press
- N2 Feed water connection
- N3 Equipment connection (350÷2000 models)
- N4 Boiler drain
- N5 Safety valve connection
- N6 Second safety level probe
- N7 Maximum level connection (mod. 1000÷2000)
- N8 TDS control probe connection
- N9 Probe barrel
- N10 Safety valve drain
- N11 Lower inspection door
